

Senior/Staff AI Product Engineer | UX & Frontend Systems

Matt Whalley

mattwhalley.com

matt@mattwhalley.com

Senior product engineer working across AI, frontend systems, design, and technical enablement. I've shipped customer-facing AI products, built agentic development infrastructure, and led engineering standards in environments where accessibility, security, and reliability are mandatory. I'm at my best going deep on hard problems and helping teams turn emerging technology into dependable software.

EXPERIENCE

Frontend Engineering Manager, DataSpring

2022 - Present

AI product engineering, UX engineering, and technical enablement

- Shipped an AI-powered provider search product now in beta with enterprise health-plan customers, combining full-roster search, lay-language specialty matching, enriched provider data, and interactive mapping using Azure AI Foundry and Azure AI Search
- Built and led enterprise rollout of a multi-agent AI development pipeline (Claude Code + Jira + ADO + Figma MCP), adopted by 5+ Wipro engineering teams and numerous internal teams across tech, product, and data functions
- Partnered with security and infrastructure teams to establish authentication, policy controls, and adoption practices for org-wide Claude Code deployment on Azure
- Prototyped an automated healthcare provider verification platform using authoritative federal and industry data sources (NPPES, OIG LEIE, SAM.gov, CMS), replacing manual lookups across multiple disconnected sources with a single automated query
- Engineered internal MCP servers for Azure DevOps, Okta, and Figma, giving AI agents live access to organizational systems across the development lifecycle
- Established design system and WCAG accessibility standards adopted across multiple product lines; served as frontend SME for a React Native app shipping to iOS and Android

Senior Digital Product Designer & Developer, Broward County Government

2014 - 2022

- Delivered WCAG-compliant public-facing digital products serving a large, diverse resident population
- Reduced delivery timelines 25% by designing and implementing a county-wide design system
- Introduced machine translation via Microsoft Cognitive Services, expanding access for non-English-speaking residents
- Trained 100+ staff in accessibility standards and CMS best practices, reducing support overhead and improving content quality.

SKILLS

AI Product Engineering Azure AI Foundry, Azure AI Search, MCP, Agentic Workflows, Claude Code, RAG, AI Evals, Azure AI Services

UX & Frontend Engineering React, React Native, TypeScript, Design Systems, Accessibility (WCAG)

Technical Leadership Architecture Reviews, Engineering Enablement, Cross-Functional Delivery

EDUCATION

Bachelor of Arts (B.A.) in Psychology & Technology – Florida International University

2019

Associate of Science (A.S.) in Graphic Design – Broward College

2014

CERTIFICATIONS

Azure AI Engineer Associate — Microsoft

2024

Interface Design Certificate — Shift Nudge

2022

Foundations of UX Design Certificate — Google

2021

Mobile Web Specialist Nanodegree — Udacity

2018
